# 1 Testing some theorem stuff

## **Definition 1.1.**

Here is a definition

## **Example 1.1.**

Here is an example.

Here is some more boring text in between.

## **Theorem 1.1** (Foo).

Bookdown is needed for things like theorems and internal references

## **Proposition 1.2** (Thingy we need for 1.1).

You can create new theorem types

**Proof.** [Of theorem 1.1] Here is a proof

## **Proof of theorem 1.1.**

Here is a proof

**Proposition 1.3.**

Bookdown is needed for things like theorems and internal references

**Thought 1.1** (Bar of 1.1).

You can create new theorem types

**Defns.**

You can create new unnumbered theorem types

**Nugget 1.2.**

You can create new theorem types

**Example.**

An example

**Solution 1.1.**

You can create new theorem types

**Exercises.**

Here is a question

**Solution.**

Test

## 2 Testing the reference link back

Now go to theorem 1.1 or thought 1.1

**Solution.**

Test

**Definition 1.1.**

Here is a definition

**Thought 1.1** (Bar of 1.1).

You can create new theorem types

Now an actual new thing:

**Thought 2.1.**

Stuff and nonsense
