

Test 013: New theorems, numbering and styles with lists immediately inside and a newline present in clear and large

Emma Cliffe, Skills Centre: MASH, University of Bath

September 2022

Contents

1	Itemize without theorem	1
2	Testing some theorem stuff	1
3	Testing the reference link back	2

1 Itemize without theorem

- One
- Two

2 Testing some theorem stuff

Definition 2.1.

- One
- Two

Here is a definition.

Example 2.1.

- One
- Two

Here is an example.

Here is some more boring text in between.

Theorem 2.1 (Foo).

- *One*
- *Two*

Bookdown is needed for things like theorems and internal references

Proposition 2.2 (Thingy we need for 2.1).

- One
- Two

You can create new theorem types

Thought 2.1 (Bar of 2.1).

- *One*
- *Two*

You can create new theorem types

Proof (Of theorem 2.1).

- *One*

- *Two*

Here is a proof

□

Proof of theorem 2.1.

- One
- Two

Here is a proof

□

Defns.

- *One*
- *Two*

You can create new unnumbered theorem types

Nugget 2.2.

- One
- Two

You can create new theorem types

Example.

- *One*
- *Two*

An example

Solution 2.1.

- One
- Two

You can create new theorem types

Exercises.

- *One*
- *Two*

Here is a question

Solution.

- One
- Two

Test

3 Testing the reference link back

Now go to theorem 2.1 or thought 2.1

Solution.

- One
- Two

Test

Definition 2.1.

- One
- Two

Here is a definition.

Thought 2.1 (Bar of 2.1).

- *One*
- *Two*

You can create new theorem types

Now an actual new thing:

Thought 3.1.

- *One*
- *Two*

Stuff and nonsense
